Cointab Software Private Limited

Data Analyst

Job Description

We are a rapidly growing SaaS Software Company looking for a Data Analyst who can create analytical reconciliation models, reports and MIS on financial data using our own web-based SaaS software for data analysis.

As part of the Data Analysis team, your work will include but shall not be limited to:
- Analyze multiple data set to find logic within them, find correlations
- Write logic to clean, transform, enrich data
- Write logic to join the data
- Write complicated calculation logic
- Identify & classify right & wrong scenarios, patterns in data
- Create financial reconciliation models
- Create reports, MIS

We have created our own web-based SaaS software (similar to SQL / R / SAS / Excel) for performing analysis on any financial data set, hence you'll be using it to help our clients discover insights in their financial data.

Desired Candidate Profile
- Proven work experience of creating reports, MIS, analytical models, reconciliation, etc. using any software or programming language
- You should have keen interest in studying data
- You are open to learning new technologies and frameworks because with Cointab you'll be working on our in-house built software framework
- You should have good communication skills to interact with clients and understand their requirements
- You should have the ability to test your own logic and make suitable corrections to get it right
- You should be able to explain your work clearly and concisely
